Hello Ran!

This is your **CS 170 Grade Report** for Spring 2019. We made this summary of your grades in the class so you can confirm that everything was calculated right:

1. For each assignment, we divided the points you had over the points available for the assignment. This gives each assignment a score between 0 and 1.
2. We weighted each assignment as detailed in the course policies.
Homework: 15%, **Project:** 5%, **Midterm 1:** 20%, **Midterm 2:** 25%, **Final:** 35%
3. We adjusted weights to drop your two lowest homeworks. This also keeps track of any special cases you may have arranged with us.
4. Your final score is computed as a weighted average of your assignment scores, using the weights we computed for you.

Please find your scores on the next page. The next page also contains your letter grade.

We are no longer taking regrade requests for assignments, but if you see something calculated wrong here, please submit a regrade request. Specifically, submit a regrade **only if** you see one of the following things:

- We dropped the wrong homeworks or the wrong number of homeworks.
- The weights for other assignments like midterms is not correct.
- Your project score is extremely low (less than 0.2) or a 0, even when you did the project.

Please be mindful of our time. If you submit a regrade request for something that isn't one of the above things, we will not look at any of your requests. You will be able to submit a regrade request until **Friday, 5/24 11:59pm PST**.

Thanks. We hope most of all that you enjoyed CS 170. The entire staff had a great time teaching you, and we hope that the class was a good experience for you. Don't hesitate to email cs170@berkeley.edu if you have questions.
